<b>Office Action Summary</b>	<b>Application No.</b> 10/597,440	<b>Applicant(s)</b> BEVAN ET AL.	
	<b>Examiner</b> Necholus Ogden, Jr.	<b>Art Unit</b> 1796	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2-4-2010 has been entered.

2. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over RU (2180213) or RU (2185814) in view of Albrecht et al (2006/0121807) is withdrawn.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Art Unit: 1796

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

1. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over RU (2180213) or RU (2185814) in view of O'Grady et al (2005/0112084)

2. RU '213 and RU '814 disclose and comprise cosmetic preparation compositions comprising sapropel as an active ingredient for the treatment skin disorders or skin cleansing (see abstracts).

3. RU '213 and RU '814 are silent with respect to the addition of fatty acid soap in their cosmetic preparations compositions.

4. O'Grady et al disclose a cosmetic preparation composition that includes fatty acid soaps such as potassium and sodium fatty acids (0005). Moreover, Albrecht et al include humectant agents such as glycerine (0005) to further aid in the moisturizing of the skin during the cosmetic preparation process.

5. It would have been obvious to one of ordinary skill in the art, in the absence of a showing to the contrary, to include the fatty acid soap to the cosmetic preparations of RU '213 or RU '814 since O'Grady et al teach that fatty acid soaps and glycerine are

Art Unit: 1796

well known in cosmetic preparations and further they continue to provide skin treating qualities as well as cost effective benefits (0002).
